EDUCATION

Texas A&M University, Mays Business School

M. S. in Management Information Systems

Coursework: Adv Data Management Systems, Data Mining & Analysis, Blockchain & AI, Statistical Foundation for Data Science

College Station, TX

May 2027

University of Mumbai, D. J. Sanghvi College of Engineering

B. Tech in Information Technology with Honors in DevOps – GPA: 3.96/4

Coursework: Artificial Intelligence, Database Management Systems, Data Warehouse and Mining, Business Analytics, Predictive Analytics, Big Data Analytics, Statistical Analysis, Cloud Engineering, Management Information Systems, DevOps, MLOps

Mumbai, India

May 2025

EXPERIENCE

Data Engineering Intern, Tesla, Palo Alto, CA

May 2026-Present

- Building end-to-end streaming data pipelines with Python-based Kafka consumers, enforcing data validation, schema standardization, and quality checks across supplier APIs and downstream relational databases.
- Performing production data analysis using SQL and building Grafana dashboards to monitor key manufacturing metrics including yield rate, Cpk, and machine-level cycle time.
- Developing computer vision and AI models for defect categorization; applying PCA, correlation analysis, and significance testing using JMP and Python.
- Leading data pipeline implementations across contract manufacturers and driving data literacy within the organization.

Full Stack Developer, Texas A&M University, College Station, TX

Jan 2026-May 2026

- Designed and maintained relational and NoSQL (MongoDB) databases storing student and faculty records, ensuring data accuracy, access control, and scalability.
- Built n8n and App Scripts automation workflows for notifications and reminders, reducing manual coordination.

Data Analyst Intern, Acma Computers Ltd, Mumbai, India

Jul 2024-Oct 2024

- Designed and maintained Python and SQL-based data ingestion and transformation pipelines supporting analytics and operational monitoring across system integration logs.
- Diagnosed pipeline bottlenecks and data quality failure modes, improving processing efficiency by 15% and contributing to a 10% reduction in system downtime.
- Implemented automated data validation, consistency checks, and reconciliation logic, improving operational data accuracy by 20%.

Software Developer Intern, C-DAC India, Mumbai, India

Dec 2023-May 2024

- Deployed a production-grade platform on AWS EC2 serving 2M+ students; focused on system reliability, data flow, and large-scale delivery.

PROJECTS

[AetherMart E-commerce Data Platform](#) | AWS, MariaDB, Python, NoSQL, Vector Search, Tableau

December 2025

- Engineered automated data ingestion and ETL pipelines using Python and SQL on AWS EC2, integrating structured (MariaDB Galera Cluster) and semi-structured (NoSQL) sources for downstream analytics.
- Designed a highly available 3-node MariaDB Galera Cluster, reasoning about replication, consistency, and fault tolerance while enforcing security controls (RBAC, encryption).
- Validated model outputs and surfaced insights via Tableau dashboards for stakeholders.

[AI Agent Lab](#) | LangChain, LangGraph, CrewAI, Groq, Vector Databases

December 2025

- Built Retrieval-Augmented Generation (RAG) pipelines with vector databases and LLaMA-based models to enable context-aware, grounded responses over heterogeneous datasets.
- Integrated high-performance inference using Groq to reduce latency in agentic workflows and support real-time interactions.

[Interpretable Machine Learning in Healthcare – An XAI Approach for Diabetes Prediction](#)

June 2025

- Conducted applied ML research on interpretable AI models using LIME, SHAP, and PDP; published in IJTE, presented at ICMAAI-25.

[Comparison of YOLO Models for Object Detection from Parking Spot Images](#)

April 2024

- Benchmarked YOLOv5, YOLOv7, and YOLOv8 variants across precision, recall, mAP, and inference speed for smart parking deployment; published in Scopus-indexed journal.

SKILLS

- **Languages:** Python, SQL, R, ReactJS, JavaScript, C, HTML/CSS, [Node.js](#)
- **AI & ML:** Agentic AI, LLMs, RAG, LangGraph, LangChain, CrewAI, XAI, YOLO, Computer Vision, MLOps
- **Data Science & ML Libraries:** Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV, Matplotlib, PyTorch, XGBoost
- **Data:** PostgreSQL, MySQL, MariaDB, MongoDB, NoSQL, Vector Databases, Grafana, Tableau, Power BI
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), GCP, Kafka, Azure, CI/CD (GitLab), DevOps (Honors)
- **Certifications:** AWS Certified AI Practitioner, Google Cloud Career Practitioners, AI for Project Managers, n8n
