EDUCATION

Texas A&M University, Mays Business School

College Station, TX

M. S. in Management Information Systems

May 2027

Coursework: Adv Data Management Systems, Data Mining & Analysis, Blockchain & AI, Statistical Foundation for Data Science

University of Mumbai, D. J. Sanghvi College of Engineering

Mumbai, India

B. Tech in Information Technology with Honors in DevOps

May 2025

Coursework: Artificial Intelligence, Database Management Systems, Data Warehouse and Mining, Business Analytics, Predictive Analytics, Big Data Analytics, Statistical Analysis, Cloud Engineering, Management Information Systems, DevOps, MLOps

EXPERIENCE

Data Engineer Intern, Tesla, Palo Alto, CA

May 2026-Present

- Build and maintain **real-time data ingestion pipelines** using Python, Kafka, and REST APIs, processing **10K+ daily JSON and image records** across **6 production lines, 60+ machines, and 25+ part variants**.
- Engineer **Go-based image ingestion and monitoring tooling** using **AWS S3** for AOI, X-ray, and SPI systems, with low-bandwidth, dependency-free deployment and **minute-level heartbeat monitoring and alerts** through **Splunk** across 40+ connected cameras.
- Analyze manufacturing data using SQL across **PostgreSQL, MySQL, and ClickHouse** and develop **15+ Grafana dashboards** for operational analytics, including **yield, Cpk, cycle time, EOL performance, and machine-level trends**.
- Develop **YOLO-based computer vision models** for automated defect inspection and pass/fail analysis, owning image collection, dataset curation, labeling, model training, and statistical root-cause analysis.

Full Stack Developer, Texas A&M University, College Station, TX

Jan 2026-May 2026

- Designed relational and MongoDB data models for student/faculty applications and built **n8n and Apps Script automation workflows** supporting notifications, access-controlled data operations, and administrative processes.

Data Analyst Intern, Acma Computers Ltd, Mumbai, India

Jul 2024-Oct 2024

- Built and optimized **Python/SQL ETL pipelines** for operational system-integration data, improving processing efficiency by **15%** and contributing to a **10% reduction in monitoring-related downtime**.
- Implemented automated **schema, validation, consistency, and reconciliation checks**, improving operational data accuracy by **20%** and increasing reliability of downstream analytics.

Software Developer Intern, C-DAC India, Mumbai, India

Dec 2023-May 2024

- Built and deployed a production-grade full-stack platform on **AWS EC2 serving 2M+ students**, gaining experience with system reliability, backend data flows, and large-scale production deployment.

PROJECTS

[AetherMart E-commerce Data Platform](#) | AWS, MariaDB, Python, NoSQL, Vector Search, Tableau

December 2025

- Engineered a hybrid data platform using **Python/SQL ETL**, MariaDB, and MongoDB on AWS EC2, implementing **CDC-based synchronization** between relational and document stores for downstream analytics.
- Designed a highly available **3-node MariaDB Galera Cluster** with replication, fault tolerance, RBAC, data-quality logging, and secure access controls.

[CMIS Engagement Platform](#) | Streamlit, Python, MongoDB, VectorDB, Groq, n8n, pdfplumber

December 2025

- Built a data-backed engagement platform supporting student, mentor, and administrator workflows, designing **MongoDB data models** and backend logic for profiles, events, applications, matching, and role-based access.
- Developed automated workflows and an **AI-assisted matching system** combining skills, interests, and resume similarity to generate ranked mentor recommendations; awarded **2nd Place Overall** at the 2025 CMIS Case Competition.

[Interpretable Machine Learning in Healthcare – An XAI Approach for Diabetes Prediction](#)

June 2025

- Developed and evaluated interpretable ML models using **SHAP, LIME, PDP, and statistical evaluation**; published in **IJTE** and presented at **ICMAAI-25**.

SKILLS

- Languages:** Python, SQL, Go, R, JavaScript, ReactJS
- Data Engineering:** Kafka, REST APIs, ETL/ELT, Streaming Pipelines, Data Modeling, Schema Design, Data Validation
- Databases:** PostgreSQL, MySQL, ClickHouse, MariaDB, MongoDB, Vector Databases
- Analytics & ML:** Pandas, NumPy, Scikit-learn, XGBoost, PyTorch, OpenCV, JMP, PCA, Statistical Analysis
- Visualization & Observability:** Grafana, Tableau, Power BI, Splunk, Streamlit
- Cloud & DevOps:** AWS (S3, EC2, Lambda), GCP, Azure, Git/GitHub, CI/CD
- Applied AI:** YOLO, Computer Vision, RAG, LLMs
- Certifications:** AWS Certified AI Practitioner, Google Cloud Career Practitioners, AI for Project Managers, n8n
